Tramigo T22 for Companies

The ultimate fleet tracking solution

Track and monitor all your company vehicles either from one PC or the privacy of your mobile phone without monthly fees.

- ☞ Prevent unauthorised driving
- ☞ Locate and guide your vehicles
- ☞ Monitor fleet movements
- ☞ Protect unguarded assets
- ☞ Automatic trip reporting
- ☞ Display all vehicles at once on screen with the press of a button, turn on several tracking options quickly to closely track stolen vehicles or expensive cargo.

If It's Valuable "Track It"

- ☞ Find your car, boat, motorhome or motorbike with just one SMS text
- ☞ Get instantly notified if your vehicle is stolen
- ☞ Motion sensor alarm
- ☞ Instant alerts if increased bilge water level, or your vessel has become un-anchored.
- ☞ Get a SMS when the person or asset carrying the T22 starts moving
- ☞ Listen to the surroundings of the T22 with the remote microphone accessory
- ☞ Panic button/silent alarm for emergencies

FREE Software

M1 Move is an excellent smartphone tool for small fleet owners on the move or to enhance your tracking experience with easy-to-use menu and extra features.

M1 Fleet for PCs is perfect for fullscale fleet management with extensive reporting and security features. Set-up a fleet control centre instantly and without monthly fees or 3rd party tracking servers. Your privacy and fleet are secure. An additional unit is required to operate the M1 function from a PC.

Three phone pictures with Map location in the UK.

Easy menu navigation. Instant replies via SMS. Display TLD and online map.

M1 Move and Fleet software enhance the T22, but are not obligatory. T22 can be used with any GSM phone model with easy to use text commands.

M1 Fleet and Move software display TLD landmarks on top of an online map, making it instantly understandable
